

# PRODIM

## Construct Series

The Construct Series is the perfect solution for fabricators and installers. The CS machines are durable and designed to be used in tough working conditions. They are lightweight and easily carried on and off job sites. It is the true balance between performance and price.

### Proliner® 8CS

The Proliner 8CS is a totally self-contained unit available in a 2D/3D output. Advanced in functionality and appearance, this model completes all your measurements on the job site without any problem. Dimensions can be checked and drawings can be edited directly on the Proliner, thanks to the comprehensive integrated CAD software.

**PROLINER®**

**Professional Dimensioning  
for Production Improvement**

## Measure

- 2D and full 3D
- Fully portable
- No levelling and no targets required
- Multiple positioning to increase range and reach
- Continuous scribing
- Digitize large and small details

## Software

- Measure 3D
- Check dimensions
- Edit drawings
- Tangential contour for optimal CNC use
- Additional software programs available

## Hardware

- 10" screen
- Weight: 10 kg
- Compact body case (38x32x18 cm)
- Working range: 15 m
- Precision: 0.6 mm
- Built in inclinometer (check level and plumb)
- Full set of accessories available

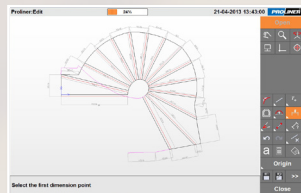

## Advantages

- Eliminate mistakes
- One person operation
- Solid build and precise Prodim mechanics
- No need of physical templates
- Immediate digital output ready for production
- No need of third party computer
