PROLINER CS SURVEY

SET OUT YOUR
DRAWING ON-SITE
AND MARK YOUR
FIXTURE POINTS

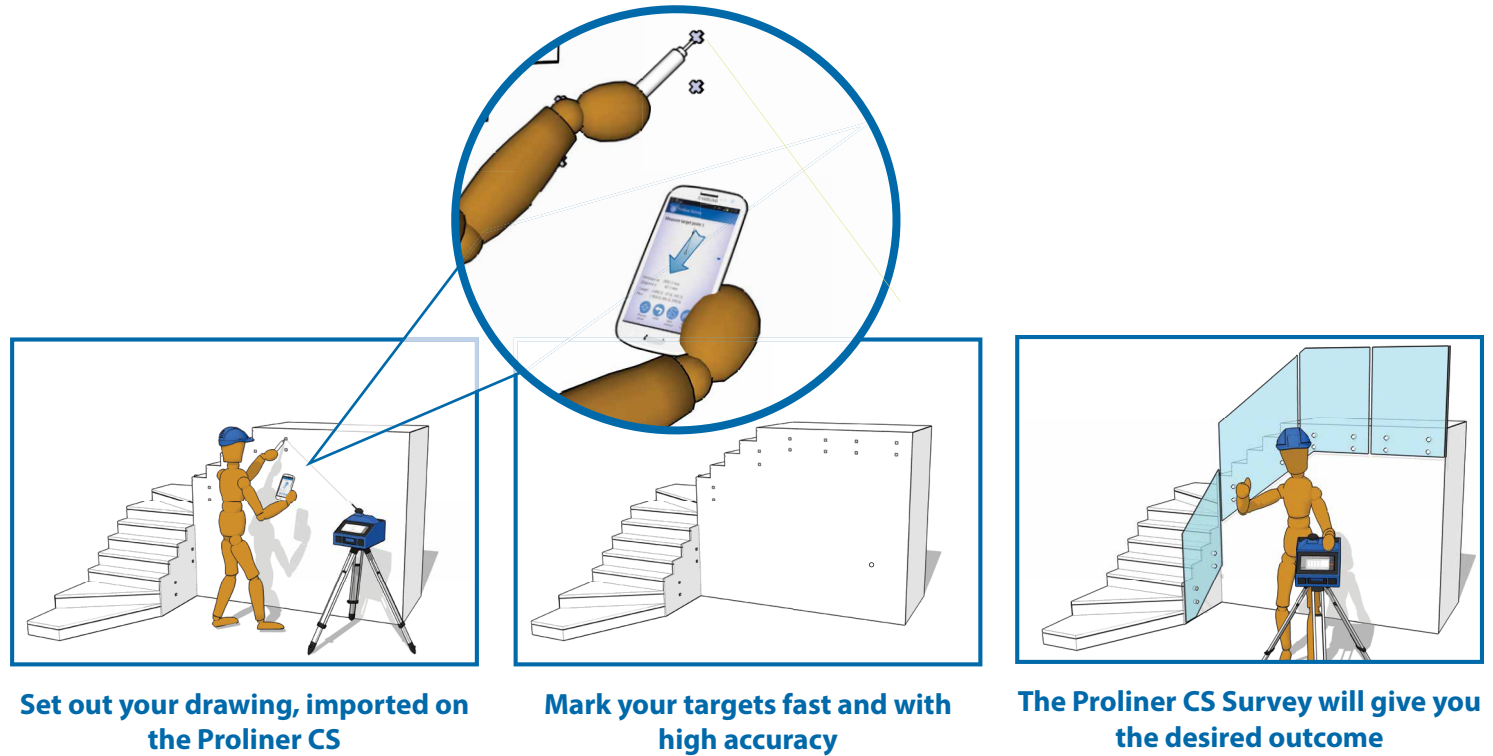

Professional Dimensioning *for* Production Improvement

REFERENCE YOUR DIGITAL PLAN TO REALITY WITH THE PROLINER CS SURVEY

When you have your digital drawing the next step is to determine where the right positioning is on the job site. Proliner CS Survey is a flexible and easy to use tool to layout your drawing on site.

It is no longer necessary to do a manual layout, Proliner CS Survey will direct you by touch screen navigation to the target, with extreme accuracy.

Proliner CS Survey exists out of the Proliner CS and the Survey phone app (for android)*. To layout your 2D/3D drawing on-site, simply import the drawing onto the Proliner and your phone will navigate you to the right target on your chosen plane.

The benefits of the Proliner CS Survey are immediate: it works quicker, more accurate and it eliminates mistakes during construction. Let the Proliner CS Survey tools do all the lay-out work, so you can work fast and have the reliable outcome you desire: your drawing quickly and correctly set out in the field.

Working method:

- Load the drawing on the Proliner.
- Connect the Proliner with your phone via Bluetooth.
- Measure two reference points according to which the markers need to be positioned.
- Choose the points you need to lay out.
- Let your phone functions navigate you to the points.
